

Its traditional
taste of India!

www.hlfoodproducts.com

Who We Are

"We offer you the best Indian foods retaining all their essence as made in your own Indian home kitchens and along with that, We ensure fair trade in all our food product supplies and exports"

What is Retorting?

Retorting is heating of low acid foods prone to microbial spoilage in hermetically sealed containers to extend their shelf life. The goal of retort processing is to obtain commercial sterilization by application of heat.

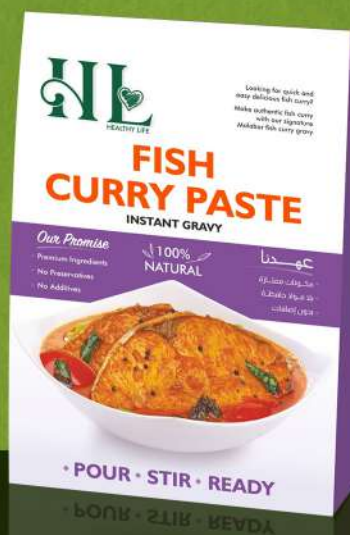

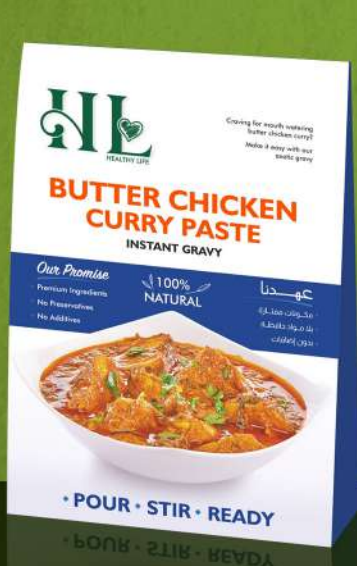

Benefits of Retort Packaging

- Product shelf lives similar to canned products
- No refrigeration required
- Transportation and storage cost savings
- Improved product taste and appearance
- Increased retention of vitamins, minerals, and other nutrients
- Less space required before filling and after emptying
- Easy-to-open using built-in top notches
- Flat, forward-facing fronts for easy branding
